brand energetics

one day workshop

Saturday 21st January 2012

Building your energetic brand - a new approach to life

We live in a Universe of vibration. Everything, including each of us, vibrates at a unique measurable frequency. Our experiences are directed by The Law of Attraction, which states that things of a like vibration are drawn to each other. Whatever frequency we choose to transmit will draw a corresponding experience. So, through the Law of Attraction, we create our own reality.

We build lives we love when we are able to hold our authentic frequency. In that space, we will attract everything we need. It cannot be any other way. Like attracts like. We will be doing what we love, with people we love in a place we love.

The skill is simply establishing and holding that frequency. Many of us have lost touch with who we really are. We are told we can't earn a living doing what we love. We are taught to stop dreaming. We are encouraged to compromise. As a result, we hold a frequency of not being able to and so create a reality of not being able to.

This one day workshop is designed to help you establish a clear coherent attractor frequency. There will only be ten places available to give each participant time to develop their individual frequency. We will spend the morning exploring the world of frequency, the Law of Attraction and the Creative Space programme with case studies showing how these can be used to create a life you love.

In the afternoon we will play with the Creative Space programme and ideas to enable you to build a clear coherent attractor frequency.
